

Salesforce, Data & AI Consultant

NICOLAS SCHNEIDER

PROFILE

Consultant with a background in Applied Mathematics, building CRM, data and AI solutions. My work spans Salesforce Consumer Goods Cloud, Azure integration and Microsoft Fabric analytics. I develop business workflows and APIs, connect reliable data pipelines, and build AI document-processing applications with human review. I also set up local inference environments and evaluate model quality, performance and fine-tuning results.

SKILLS

- Salesforce: Apex, SOQL, LWC, Flows
- Azure Data Factory, Azure SQL / T-SQL
- Microsoft Fabric, Delta Lake, ETL / ELT
- Python, TypeScript / JavaScript, C# / .NET
- Node.js, REST APIs, PostgreSQL
- AI extraction, JSON Schema, model evaluation
- vLLM, LiteLLM, QLoRA / Unsloth
- Docker, Git, Azure DevOps, Terraform
- Container Apps, Service Bus, Blob Storage

LANGUAGES

German: Native language

English: Business fluent

PROFESSIONAL CAREER

- 07.2025 - Present
4brands Reply
Consultant
- 11.2024 - 05.2025
Fraunhofer IPT
Master's thesis student
- 10.2024 - 06.2025
4brands Reply
Working Student / Data Analyst
- 02.2023 - 08.2024
Diamant Software
Working Student / Data Scientist
- 11.2022 - 02.2023
Diamant Software
Bachelor's thesis student
- 08.2022 - 10.2022
Diamant Software
Intern

EDUCATION

- 03.2023 - 06.2025
HSBI Bielefeld
M.Sc. Optimization and Simulation
Grade: 2.0 (German scale)
- 09.2019 - 02.2023
FH Bielefeld
Bachelor of Applied Mathematics

PROFESSIONAL CAREER

WORKING EXPERIENCE

07.2025 - Present

Consultant at 4brands Reply

Develop Salesforce Consumer Goods Cloud solutions using Apex, Lightning Web Components and Flows, including PDF generation, contact synchronization and data maintenance. Build Azure Data Factory and SQL pipelines for scoring, export and reconciliation, plus Fabric transformations for sales-target reporting.

Implement AI menu and receipt extraction applications with Salesforce review interfaces, TypeScript APIs and workers, PostgreSQL, Azure Blob Storage and Service Bus. Add schema validation, retries and idempotent processing; package delivery with Docker, Azure DevOps and Terraform.

Set up local vLLM / LiteLLM inference and monitoring. Benchmark answer quality, tool calling, document parsing, latency and throughput; run QLoRA experiments and compare them with the base model. Develop a .NET benchmark worker to compare Salesforce-to-SQL synchronization with ADF.

11.2024 - 05.2025

Master's thesis student at Fraunhofer IPT

Developed a decision framework for selecting multimodal data-integration approaches based on technical documentation for LLM-driven maintenance support.

10.2024 - 06.2025

Working Student / Data Analyst at 4brands Reply

Processed and analyzed Salesforce data using Microsoft Azure and SQL. Developed data-preparation workflows and supported cloud-based reporting and integration.

02.2023 - 08.2024

Working Student / Data Scientist at Diamant Software

Prepared and expanded training data for a large language model predicting invoice approvers. Developed training and evaluation workflows and trained and evaluated adapters on a multitask model.

11.2022 - 02.2023

Bachelor's thesis student at Diamant Software

Compared relational database and Elasticsearch performance for inserting and searching log data.

EDUCATION

UNIVERSITY EDUCATION

- 03.2023 - 06.2025
M.Sc. Optimization and Simulation at HSBI Bielefeld | Grade: 2.0
Graduated in June 2025 (German grading scale). Focus on simulation of technical processes, discrete and bionic optimization methods, with additional modules in Data Science. Thesis research addressed multimodal data integration for AI-based maintenance support.
- 09.2019 - 02.2023
Bachelor of Applied Mathematics at FH Bielefeld
Applied mathematics with emphasis on Operations Research, logistics and the implementation of mathematical algorithms, including the Traveling Salesman Problem.

INTERNSHIPS

- 08.2022 - 10.2022
Internship at Diamant Software
Developed a log-processing tool using Elasticsearch and Kibana for storage, search and visualization to support technical issue analysis.
- 04.2017
Internship at Dorbath Surveying Office
Gained practical experience in office and field surveying, including the use of technical instruments for measuring facilities.

ADDITIONAL EXPERIENCE

- 08.2020 - 05.2021
Interviewer at SOKO Institut
Conducted interviews on behalf of the Federal Employment Agency.
- 08.2020 - 12.2022
Mathematics Tutor at Studentenring Bielefeld
Supported students of different ages in mathematics.
